

Stomatitis Preparations Kenmore Rx Center Tel: (716) 874-6360 Fax: (716) 874-6369

USP nor NF monographs exist for the following, so they are not "official" products, and subject to prescriber modification. They have been known as Magic Mouthwash, Rothwell's Solution, and Stomatitis Mixture, as well as the names listed below. Listed here are common ingredients used for various popular stomatitis formulas. Individual ingredients, their quantities, and the total volume should be listed on prescriptions to avoid confusion. Ingredients for any formula may be added, deleted, or changed by the prescriber to customize to individual needs. Flavorings, bitterness suppressors, and sweeteners can be added by the pharmacist where appropriate. *Final volume may be prescribed in any quantity and the individual ingredients adjusted appropriately

		Tetracycline HCl powder	Nystatin oral susp 100,000 units/ml	Hydrocortisone powder	Purified water	Dyclonine	Lemon Oil	Glycerin	Diphenhydramine 2.5mg/ml syrup	Diphenhydramine HCl powder	Chlorpheniramine powder	Chlorpheniramine 0.4mg/ml syrup	Dexamethasone oral solution 0.1mg/ml	Suspending Vehicle	Simple Syrup	Lidocaine 2% viscous solution	Maalox/Mylanta Liquid Antacid	Tetracaine HCl powder	Sucralfate powder
